Education

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY, TRICHY

June. 2023 – June 2027

Bachelor of Technology in Computer science

With specialization in Artificial Intelligence and Machine Learning

Chennai, Tamil Nadu

Relevant Coursework

- | | | | |
|-----------------------|---------------------------------|---|-----------------------------|
| • Data Structures | • Operating Systems | • Software Development Lifecycle (SDLC) | • Human Resource Management |
| • Machine Learning | • Computer Architecture | • Engineering Mathematics | • Marketing Management |
| • Algorithms Analysis | • Software Engineering | • Accounting | • Financial Management |
| • Database Management | • Agile and Scrum Methodologies | | |

Projects

YOLO-Based Real-Time Anomaly Detection System for Football

Developed a real-time system to detect fouls and rule violations in football using the YOLOv8 object detection algorithm. Enhanced video-based referee assistance by identifying suspicious actions through live visual analysis.

Fake News Detection System — Python, NLP, Logistic Regression

Built a text classification model using logistic regression and TF-IDF for detecting misinformation in online articles. Trained on a labeled dataset and optimized using confusion matrix and accuracy metrics.

Drowsiness Detection Research Project — OpenCV, CNN

Researched and proposed a real-time drowsiness detection model using facial landmarks and CNNs.

Technical Skills

Languages: Python, SQL, HTML, CSS

ML & Data Tools: NumPy, Pandas, Scikit-learn, Matplotlib, TensorFlow (basic)

Frameworks & Platforms: Jupyter Notebook, Google Colab, Git, GitHub

Databases: MySQL, SQLite, HeidiSQL

Concepts: Regression, Classification, Feature Engineering, Model Evaluation

Other: Linux Basics, Agile Methodologies, Technical Writing, Aptitude Training

Internship Experience

Artificial Intelligence Intern-(ON-SITE)

- Interned at KrypC Technologies Pvt Ltd, contributing to AI-based solutions.
- Worked on real-time machine learning models for enterprise applications.
- Collaborated with mentors to build and optimize AI algorithms using Python and relevant frameworks.
- Gained hands-on experience in AI development lifecycle, from data preprocessing to model deployment.

Machine Learning Intern

Prodigy Infotech – Remote [2024-December]

- Worked on real-time predictive modeling projects using supervised learning techniques.
- Implemented ML algorithms for classification and regression using Python and Scikit-learn.
- Gained hands-on experience in data preprocessing, model evaluation, and visualization.

Machine Learning & Graphic Design Intern

Skillcraft Technologies – Remote | [2025-March]

- Built machine learning models and supported the development of data-driven features.
- Designed professional-level graphics, banners, and social media creatives using Canva and Adobe tools.
- Collaborated cross-functionally to integrate visual content into ML product presentations.
